Capture and Archive with Veritas Merge1™

Universal Collection for Audio and Video File Types

Support data compliance, information governance, surveillance, and eDiscovery tasks with the efficient capture, organization, and archiving of audio and video files from any source. A universal collector, [Veritas Merge1](#) for Audio/Video is designed to ensure meticulous data organization using a structured approach to naming and storing attachments.

The collector gathers audio/video files with their associated metadata. It captures participant details in a conversation, as well as the recording start and end times. The collected data is then mapped using a customizable XML template. This mapping process depends on the specific metadata available and may vary accordingly.

Benefits

- Avoid fines, penalties, and other enforcement actions by regulatory bodies such as the SEC and FINRA
- Reduce compliance-related costs and recurring fees
- Mitigate the risks involved with internal investigations, external audits, and lawsuits
- Capture all communications and maintain control of your organization's data

Key Features

- Universal Collection: Collect audio and video files from any source, making it versatile and widely applicable to diverse sources
- Customization: Customize XML templates to meet specific requirements, enhancing usability and efficiency
- Data Organization: Capture of files and relevant metadata (including participant details and timestamps) ensures comprehensive data organization
- Transcription and Indexing: Transcribe and index archived files for easy search and retrieval

The Veritas Merge1 for Audio/Video Collector Captures:

- Audio/video content exported by source (MP3, MP4, WAV, and others)
- Participants: From, To, CC, and BCC
- Activity start and end time
- Additional activity metadata as available

The Ideal Combination of Power and Simplicity

Veritas Merge1:

- Combines chats into easy-to-read threads
- Provides a single cloud-based repository for capture, archiving, discovery, and surveillance
- Is fully customizable, plus easy to set up and deploy
- Archives custom headers (where applicable)
- Produces a similar look and feel to the native message

Veritas Merge1 archives a wide range of content types, including social media, chat, financial platforms, and cloud-based data. Tailor it to archive any type of content. With the ability to archive all your communications, Veritas Merge1 helps ensure compliance with industry regulations and improve the outcome of the eDiscovery process.

Veritas Alta Capture is an integral and invaluable tool. My team uses Veritas Alta Capture to meet company needs for capturing EML/Reuters, Blackberry, Symphony, and Bloomberg data. The product is intuitive, easy to set up, and I appreciate the personalized sales and support attention we receive. I would recommend Veritas Alta Capture to anyone."
