

# NetBackup Subscription

## Veritas NetBackup Subscription

### Giving you control over your journey to cloud-first.

Most organizations are in the midst of modernizing their IT infrastructure and operations to take advantage of the speed, scale, and efficiencies cloud-first models can deliver. A Veritas NetBackup™ software subscription provides greater alignment with your current and future IT and cloud plans, delivering more for your NetBackup investment—more innovation, control, and value—in support of your digital transformation.

### Accelerate Your Cloud Journey

A Veritas subscription supports your cloud-first approach, giving you the ability to scale your capacity and maximize the impact of your cloud investments. It ensures you have ongoing access to product innovation today and in the future. With a subscription, you stay current on NetBackup capabilities and innovations with continuous enhancements that help you future-proof your deployment. Plus, if you have cloud provider commitment dollars, you'll be able to use them toward your NetBackup term subscription as we increase our presence in cloud provider marketplaces.

### Drive Your Success

A Veritas subscription gives you control over your investment, offering flexible billing options and multi-year contracts with additional capacity purchase options during the initial term that simplify planning, forecasting, and budgeting. You can manage your continued growth by adjusting capacity on a go-forward basis and leverage competitive unit pricing over your depreciation period when you scale and add new capacity.

### Improve Your Value

New bundled subscription-only products and a single contract for software, maintenance, and support simplify acquisition and minimize ongoing administration.

### Highlights

As of April 2, 2022, you can take advantage of new NetBackup subscription licensing to:

- ✓ Access NetBackup capabilities and innovations that are only available for customers with a subscription
- ✓ Increase the value of your investment with new product bundles
- ✓ Simplify capacity forecasting—add capacity when you need it
- ✓ Lock in a multi-year contract with flexible billing options
- ✓ Provide a single contract for software, maintenance, and support
