Merge1 for Microsoft Compliance Center

Capture, import, and archive directly into Microsoft 365.

Veritas Merge1 allows administrators to securely and easily import and archive third-party data from several different platforms directly into Microsoft 365. While other products and services claim to offer similar functionality, Veritas' Merge1 stands alone as the most mature and proven solution for ingestion of multiple data types. Merge1 captures 45+ connector communications into Microsoft 365 and helps companies comply with regulatory bodies such as the SEC, FINRA, HIPAA, FDA, GDPR, CCPA and much more.

Our supported connectors are set up with your organization before creating a corresponding data connector in the Microsoft 365 compliance center. One primary benefit of using Veritas Merge1 to import and archive third-party data in Microsoft 365 is that you can apply various Microsoft 365 compliance solutions to that data after it's been imported. This helps to ensure that your organization's non-Microsoft data is in compliance with the regulations and standards that affect your organization.

> "
>
> *"Merge1 is truly a pioneer product in the space. It's an easy to set up solution for our many complex problems. The support team is top notch as well."*

Merge1 Benefits with Microsoft 365 Archive:

- Avoid hassle of running two archives in parallel
- Mitigate spending money on expensive, recurring monthly fees
- Continuously capture communications

- No training required
- Communication captured in native format
- Retains communications to comply with regulatory bodies

Today, Over 70% of Workforce Communication Takes Place Over Non-Email Sources

Capture data from the most widely used communication and collaboration tools like Zoom, Yammer, Slack, Symphony, Webex Teams, and more with Merge1, a web-based application that allows it to be monitored from any secured location.

Merge1 reports on the status of messages, including corrupt or failed messages, via email at the end of each run. Merge1 also consolidates all communications allowing Microsoft 365 to become a complete information governance solution.

Why Customers Use Merge1:

- Attachment support for total content capture
- Microsoft Compliance Center portfolio of apps integration to capture for compliance
- Message threading for easy review
- Filters and targets for better sorting and navigation

Mitigate Risk with the Power of Merge1

Veritas Merge1 has not only helped companies find their compliance peace of mind, but also has shown the ease of becoming and staying compliant. Recent changes in the workplace have forced organizations to rethink how they monitor, review, and eDiscover their data. The digital demand shift has created more data that needs to be reviewed, and pairing Merge1 with Microsoft Compliance Center provides a secure solution to keep your data protected and discoverable.

Merge1 empowers users to fully embrace all aspects of the Microsoft 365 suite of applications and assures all monitored users will stay compliant to stringent governmental and corporate rule makers.
