Veritas Resiliency Platform
Compute and Data Mover VMware VM Deployment Service.

Convert Technology Investments to Business Success

Increase value from your Veritas Resiliency Platform investment with expert deployment services by Veritas. Our professional implementation helps reduce startup risk, strengthens disaster resiliency, establishes unequalled application mobility and improves your Resilience Platform knowledge and insight.

Realize Success with a Proven Veritas Resiliency Platform Installation

The Veritas Resilience Platform Compute and Data Mover VM Deployment Service is a two-site implementation service that helps ensure Resiliency Platform and VMware virtual machines (VMs) are configured and tested to meet your automated VM failover/recovery and migration objectives.

The Deployment Service speeds acceptance of a production-ready Resiliency Platform. Our project manager helps guide you through the pre-engagement planning, environment-readiness check, installation, configuration, testing and operations demonstration steps to successful completion.

FAST
Fixed-Price Installation

WORLD-CLASS DELIVERY
by Veritas Experts

READY TO GO
Tested & Verified

Service Benefits:

- Reduce time to implement and establish automated VM resiliency

- Gain freedom to improve availability, resiliency and portability policies and strategies across your organization

- Simplify startup effort and reduce deployment risk

- Shorten the learning curve with demonstrations and hands-on experiences

Service Features:

- Expert planning and implementation
- Site-to-site, site-to-public cloud and public cloud-to-public cloud integration and failover resiliency testing of production VMware VMs
- Resiliency Platform demonstrations and knowledge transfer

The Resiliency Platform Deployment Service advances your understanding of the solution and business continuity operations, helping establish a platform to increase application availability, resiliency and mobility in your complex IT environment.

Service	NetBackup Resiliency Deployment
Pre-engagement planning	Workshop, interactive design review and readiness check
Resiliency Platform software installation	Two sites
Production environment	Yes; includes applicable Resiliency Manager, Information Management Server and Replication Gateway
Resiliency Platform configuration	Site-to-site, site-to-public cloud and public cloud-to-public cloud (for supported cloud providers)
VMware VM instances failover/failback tests	10 (maximum)
Deliverables	Configured and functionally tested Resiliency Platform and as-built documentation
