# Simplifying Data Management with Veritas Alta Copilot

## Veritas Alta Copilot

As organizations grow, so does the complexity and volume of their data. Managing this data effectively while ensuring its security and compliance is a significant challenge. Veritas, a leader in data protection and management, introduces Veritas Alta Copilot, an Al-driven solution designed to streamline data operations and simplify data management. By leveraging advanced generative Al, Alta Copilot empowers organizations to make smarter, faster, and more informed decisions.

## Bridging the Data Management Gap with AI

The exponential growth of data value, volume, and vulnerability has created a substantial data management gap, where current staff, skills, and tools are insufficient to handle the increasing demands. According to the ESG 2023 Technology Spending Intentions Survey, 45% of IT organizations face a cybersecurity skills gap, and 29% cite

a data protection skills gap. Veritas Alta Copilot addresses these challenges by focusing on three critical areas: Data Protection, Data Security, and Data Governance.

#### AI-Assisted Approach for Operational Insights

Veritas Alta Copilot offers an Al-assisted approach for operational insights, focusing on enhanced efficiency and security, and costeffectiveness and scalability. This approach enables organizations to streamline operations, enhance security, and ensure compliance.

Backup versions		Help me resolve error code 2001 in Netbackup
	<ul> <li>7 v10.4</li> <li>6 v10.3.0.1</li> <li>6 v10.3</li> <li>1 v10.2</li> <li>1 v10.1</li> </ul>	Resolving NetBackup Error Code 2001
01		To resolve NetBackup error code 2001, which indicates that no drives are available for a specific job, follow these steps:
21		1. Verify that the required drives and robots are configured and operational.
Total hosts		2. Ensure that the Itid (the NetBackup device daemon) is active and that a drive path exists and is configured for the media server required by the storage unit for the job <sup>1</sup> .
		3. If the job requires an NDMP drive path, verify that one exists <sup>1</sup> .

#### Enhanced Efficiency and Security

#### 1. GenAI-Powered Operational Insights

- Process Natural Language Queries: Alta Copilot processes natural language queries to provide curated guidance, assisting with system configuration, troubleshooting, and optimization.
- Automate Administrative Tasks: Automation simplifies complex data management, reducing the manual workload on IT teams.

#### 2. Advanced Security Posture

- Dynamic Data Visualization: Identify cyber vulnerabilities through dynamic data visualization.
- AI-Powered Anomaly Detection and Malware Scanning: Preemptively address security risks with AI-driven anomaly detection and malware scanning.

### Cost-Effectiveness and Scalability

- 1. Cost-Effectiveness
  - Reduce Need for Specialized Roles: Al-powered data management reduces the necessity for specialized roles, enhancing cost efficiency.
- 2. Adaptability and Scalability
  - Flexibility to Adapt: Al-driven solutions provide the flexibility to adapt to changing data landscapes and scale as organizational needs grow.

#### **About Veritas**

Veritas Technologies is the leader in secure multi-cloud data management. Over 80,000 customers—including 91% of the Fortune 100—rely on Veritas to help ensure the protection, recoverability and compliance of their data. Veritas has a reputation for reliability at scale, which delivers the resilience its customers need against the disruptions threatened by cyberattacks, like ransomware. No other vendor is able to match the ability of Veritas to execute, with support for 800+ data sources, 100+ operating systems and 1,400+ storage targets through a single, unified approach. Powered by Cloud Scale Technology, Veritas is delivering today on its strategy for Autonomous Data Management that reduces operational overhead while delivering greater value.
