

# Enterprise Vault Version Comparison

Features	12.0	12.5	14.0	14.1	14.2	Feature Notes
Release Date	Feb 2016	Oct 2019	Nov 2020	Mar 2021	Dec 2021	
<b>Core Enhancements</b>						
Elasticsearch Index Engine					✓	Enterprise Vault with Elasticsearch delivers faster Indexing and search performance. The new index engine offers memory and storage optimization.
PowerShell support for Index Management					✓	New PowerShell cmdlet is introduced to Manage Indexes. Rebuild, Upgrade, Sync and Verify of indexes can be performed using the new PowerShell cmdlet. The new cmdlet supports both legacy as well as Elasticsearch indexes.
PowerShell support for Snapshot Management of Elasticsearch Indexes					✓	10+ PowerShell cmdlets are shipped in EV14.2 for Snapshot managements of Elasticsearch indexes
MS Teams Collection					✓	Configuration of MS Teams is now available in EV admin console. New nodes are introduced in admin console to configure Targets, Connections, Policies and Archives.
<b>Cloud and Platform Support</b>						
Flexible deployment options	✓	✓	✓	✓	✓	Deploy on-premise, or to the cloud (AWS or Azure), or a hybrid model that meets your needs.
Multiple content sources	✓	✓	✓	✓	✓	Search, preserve, and review multiple enterprise content sources from a single vendor.
Optical Character Recognition (OCR) image conversion (new in 12.0)	✓	✓	✓	✓	✓	Ability to recognize and index text in images that are stored in EV archives. You can search for text in scanned documents, forms, faxes, or screenshots, after they are archived.
Records Management (new in 12.1)		✓	✓	✓	✓	Allows you to mark selected items such as records, conduct searches for these records, and export them for transfer elsewhere. Fulfills the requirements of Capstone (US govt. standard).
OCR conversion enhancements (new in 12.2)		✓	✓	✓	✓	Extends the OCR functionality to convert images in PDF files, Microsoft Office documents, and other file types.
Azure Cloud Storage with Native Services			✓	✓	✓	Support for Azure cloud native services: <ul style="list-style-type: none"> <li>▪ Blob as Primary Storage</li> <li>▪ Azure GovCloud</li> </ul>

Features	12.0	12.5	14.0	14.1	14.2	Feature Notes
AWS Cloud Storage with Native Services			✓	✓	✓	Support for AWS cloud native services: <ul style="list-style-type: none"> <li>▪ S3 as Primary Storage</li> <li>▪ Encryption</li> <li>▪ IAM Role</li> <li>▪ AWS GovCloud</li> </ul>
				✓	✓	<ul style="list-style-type: none"> <li>▪ S3 Object Lock (WORM)</li> <li>▪ S3 Intelligent Tiering</li> </ul>
S3 Generic Connector				✓	✓	Support for Generic S3 connector for primary partition that allows archiving on S3-compliant storage devices.
WORM for S3 Generic Connector					✓	Support for archiving data on S3-compliant storage with Object Lock enabled.
Veritas Information Classifier						
Classification	✓	✓	✓	✓	✓	A framework that allows for automatic classification, metadata tagging, and records identification—facilitating search, discovery, supervision, and many other activities.
Veritas Information Classifier support (new in 12.2)		✓	✓	✓	✓	Support for our next-gen classification engine with hundreds or built-in policies and patterns to make informed decisions around retention period, storage tier, discovery, supervision, etc.
Classification enhancements: PII		✓	✓	✓	✓	New policies for CCPA and personal data detection for Russia, Ukraine, Brazil, Iceland, Croatia, and South Africa.
Classification enhancements: PII			✓	✓	✓	New policies for personal data detection for China, Argentina and Hong Kong.
Classification enhancements: PII				✓	✓	New policies for personal data detection for United Arab Emirates, India and Mexico.
Classification enhancements: COVID-19 and ransomware policies			✓	✓	✓	New classification policies for helping users tag COVID-related as well as ransomware content.
Workplace Harassment Policy				✓	✓	Workplace harassment policy to classify data that could be related to bullying or sexual harassment.
Veritas Information Classifier – FIPS 140-2 compliant				✓	✓	Veritas Information Classifier 2.4.0 is Federal Information Processing Standards (FIPS) 140-2 compliant and meets the security requirements for cryptographic modules.
Sentiment Analysis					✓	Sentiment Analysis score can be used for Supervision to filter items with negative sentiments. For e.g.: How employees are reacting to the latest appraisals or change in HR policies etc.
Anti-Money Laundering (AML) Policy V2					✓	The Anti-Money Laundering (AML) Policy V2 can be used to aid in meeting compliance obligations for financial supervision in banking.
Material Non-Public Information (MNPI) Policy V2					✓	The Material Non-Public Information (MNPI) Policy V2 can be used to aid in meeting compliance obligations for financial supervision in banking.

Features	12.0	12.5	14.0	14.1	14.2	Feature Notes
<b>Veritas Advanced Supervision/Compliance Accelerator</b>						
Hotword Analysis		✓	✓	✓	✓	<ul style="list-style-type: none"> <li>Filter items based on existing hotwords and hotword sets.</li> <li>View count of hotwords found within each item.</li> <li>View hotword statistics found in the selected item, including the count of the hotword based on the location.</li> </ul>
Escalation Review enhancements		✓	✓	✓	✓	Reviewers now have to add a mandatory comment before escalating any message, providing context about the reason for the escalation.
Department hierarchy view		✓	✓	✓	✓	You can now view the list of departments, subdepartments and research folders in the correct hierarchy, rather than a flat list.
Advanced Supervision			✓	✓	✓	A new full-featured Veritas Advanced Supervision solution offered on both EV and EV.cloud.
Advanced Supervision - Search Preview				✓	✓	Preview of department level search results before accepting/rejecting them.
Advanced Supervision - Filter on Author and Subject				✓	✓	Filtering review items based on author or subject criteria.
Advanced Supervision - Simplified Searching of monitored employees				✓	✓	Searching and selection of monitored employees in a department while creating search.
Advanced Supervision - Auditing					✓	Capture all the changes made in the Advanced Supervision client. Search and export the audit entries for reporting.
Advanced Supervision - Custom Search Attributes					✓	Search on custom index properties is now possible in the new version of the supervision client.
<b>Discovery</b>						
Legal Holds	✓	✓	✓	✓	✓	Search, preserve, and initiate legal holds on archived data.
Restricted Searches		✓	✓	✓	✓	In Discovery Accelerator you can now restrict the searches to access information specific to the departments in Compliance Accelerator.
Export to PST enhancements			✓	✓	✓	Conversion of EML to MSG
Export to NSF enhancements				✓	✓	Discovery Accelerator allows NSF rollover while exporting Domino items into NSF files. An administrator can configure the size of the NSF file in MB beyond which it will be rolled over. The maximum size for rollover is 65535 MB.
Rich Native View of MS Teams content					✓	Search and review MS Teams content in its rich native view form. View all the edits, reactions, emojis that are part of the Teams chat.

Features	12.0	12.5	14.0	14.1	14.2	Feature Notes
<b>Usability and Reporting</b>						
Enhanced Search (new in 12.0)	✓	✓	✓	✓	✓	A number of new enhancements that improve Search capabilities, including: search suggestions (based on previous searches), a "Recents" list, and a customizable results pane.
Analytics Connector (new in 12.2)		✓	✓	✓	✓	Provides third party applications with EV index metadata - useful for analytics and machine learning applications.
New OData reports		✓	✓	✓	✓	New reports show the count of items based on the classification policy applied, and information on hotword statistics for items that were flagged by hotword hits.
Custom message types		✓	✓	✓	✓	Search for, export, and create reports for items based on selected message types.
Hit highlighting navigation		✓	✓	✓	✓	Navigate between highlighted search terms within an item. In case of multiple search keywords, you can choose the keyword that you want highlight and navigate on.
Time-based searches		✓	✓	✓	✓	The <b>Date range</b> section now includes time controls in the <b>From</b> and <b>To</b> fields that allow you to specify the time along with the date to further refine the search.
Search Classification Tags		✓	✓	✓	✓	In addition to selecting a tag value from the drop down, you can now type in the tag value to perform a search.
SMTP Server Certificate Settings		✓	✓	✓	✓	Configure connection security settings at the SMTP server-level, which override the site-level settings.
Power BI Templates for OData reports		✓	✓	✓	✓	New Power BI Templates that you can use to connect to the OData web services and generate detailed reports.
Advanced Supervision: Web-based client			✓	✓	✓	Veritas Advanced Supervision will offer a new web-based client combining the best of AdvisorMail and Compliance Accelerator functionality.
Single Sign On for Enterprise Vault Search				✓	✓	Enterprise Vault supports Single Sign-On (SSO) authentication for Enterprise Vault Search using Security Assertion Markup Language (SAML) 2.0 compliant Identity Providers (IdP).
Enterprise Vault Index Dashboard v1				✓	✓	A web-based solution that reflects the current state of Enterprise Vault Indexing at granular level that will help an administrator take actions on unhealthy indexes in a timely manner. It assists Enterprise Vault administrators overcome the challenges that they face on a daily basis with the Indexing service.
Enterprise Vault Index Dashboard v2					✓	Scheduling of searches per day/ week/month is now possible in the EV14.2
