

Enhance Cyber Resiliency for Microsoft Workloads

Veritas and Microsoft Partner to Secure Cloud and SaaS Data

Cloud and software as a service (SaaS) are key threat vectors for cyber criminals. Organizations are still largely unprepared for ransomware attacks on data stored in SaaS platforms. Fortunately, Veritas and Microsoft have partnered to prioritize security for Microsoft 365 workloads to drive confidence and compliance for organizations using the cloud.

Veritas Alta SaaS Protection provides a cloud-integrated, backup and data management platform for enterprise organizations that need granular data management capabilities, enterprise-grade security, and backup and recovery for their SaaS-based applications. Built within Azure, it provides a hosted experience for cloud data management. With Microsoft 365 Backup and Veritas Alta SaaS Protection, you can expect protection from ransomware infection and data loss with high-speed backup and recovery of data at scale.

Microsoft 365 Backup Integration

Veritas and Microsoft have been providing data management and business optimization solutions to organizations around the world for decades. Veritas integration with Microsoft 365 backup delivers enterprise data protection, recovery, and cyber resilience spanning SaaS applications, public clouds, and hybrid-cloud data, all through a common Veritas Alta SaaS Protection platform.

Powered by Microsoft 365 Backup

- Fast recovery time
- Bulk, site-level restore
- Metadata-based search
- Granular item restore

Protection from ransomware

- Air gap copy
- Granular item restore with flexible destination
- Browse and restore at item level
- Text indexing and content search

Resilience

Proactive, active, and reactive cyber security protection

Integration

Single point of management with combined benefits

Business continuity

Solving modern business continuity and disaster recovery concerns

With Veritas and Microsoft you can achieve:

- High speed movement of bulk data into and out of Microsoft 365 production environments
- Enterprise data protection, recovery, and cyber resilience spanning SaaS applications, public clouds, and hybrid-cloud data
- Multi-workload support for Microsoft 365 including Exchange, SharePoint, OneDrive, Teams as well as Entra ID
- Tightly integrate cyber resilience and recovery from ransomware
- Meet business continuity, disaster recovery, long-term data retention and governance needs
- Globally protect against data loss from malicious attacks or accidental deletion
- Meet stringent SLAs with granular recovery
- Collaborate faster to address advanced search, compliance, and discovery requests
- Deep retention and tiering management capabilities to lower total cost of ownership of Microsoft 365 services
- Snapshot-based backup optimized for deeper, more granular, content-indexed protection

How Veritas can help:

SaaS workloads come with risks, particularly the threats of ransomware and accidental (or even intentional) data deletion. Given the rising threat of data loss, it is essential that businesses protect their data. The right data protection solution combined with a trusted SaaS partner can help your business quickly recover in the event of data loss.

Veritas Alta SaaS Protection is the industry-leading backup and recovery solution for SaaS applications such as Microsoft 365.

About Veritas

Veritas Technologies is the leader in secure multi-cloud data management. Over 80,000 customers—including 91% of the Fortune 100—rely on Veritas to help ensure the protection, recoverability and compliance of their data. Veritas has a reputation for reliability at scale, which delivers the resilience its customers need against the disruptions threatened by cyberattacks, like ransomware. No other vendor is able to match the ability of Veritas to execute, with support for 800+ data sources, 100+ operating systems and 1,400+ storage targets through a single, unified approach. Powered by Cloud Scale Technology, Veritas is delivering today on its strategy for Autonomous Data Management that reduces operational overhead while delivering greater value.
