Veritas Alta™ Data Compliance: Content Capture

Simplify data gathering and minimize compliance risk.

As an integral part of our personal and professional lives, messaging apps offer convenience and speed in communication. But we often forget that they can also pose a significant risk to business information. Financial firms have recently faced hefty fines due to inadequate monitoring and archiving of employee communications through messaging apps. The situation highlights the importance of effective systems to capture, monitor, and archive all forms of communication — including popular messaging apps.

A solid information governance strategy goes a long way toward safeguarding your organization's information, preparing you for any legal challenges, and ensuring the integrity of your business. Veritas Alta Data Compliance can help you maintain a well-organized and complete record of all interactions.

Archive Conversations Across Platforms

Veritas offers a user-friendly solution to capture diverse communications files from financial messaging platforms, collaboration tools, file sharing, SMS, mobile chat, audio/visual files, and other cloud-based apps. Securely store them in your cloud archive to ensure compliance with industry regulations, support eDiscovery efforts for legal cases and investigations, and fulfill communication-retention mandates related to corporate governance and other regulatory requirements.

Meet Standards with Comprehensive Communication Supervision

Veritas Alta Data Compliance simplifies monitoring and displaying all communications with full fidelity, configuring journaling, and implementing targeted content collection. This streamlines supervisory review, enabling you to meet regulatory compliance obligations for sensitive information and integrity. The intuitive console allows seamless content classification at the source, defining patterns and policies across your organization, and ensuring comprehensive monitoring, analysis, review, and reporting. And because Microsoft has endorsed Veritas cloud-based data collection, you can trust it to ensure full conversational context and utilize continuous active learning to isolate relevant content.

Use capture with Veritas Alta™ eDiscovery or Veritas Alta™ Surveillance to support compliance with major regulatory bodies, including:

- Energy and utilities: DOE, FERC, NERC, state regulations
- Financial: CFTC, FINRA, MiFID II, SEC, SOX
- Government: FOIA, FISMA, RTI, state and country privacy acts
- International/commercial: FTC, GDPR
- Pharma and healthcare: ARRA, FDA, FDCA, HIPAA, SARS

Streamline Data Collection Access and Deployment

Enjoy the benefits of a SaaS solution. Pre-built connectors to major business and communications platforms such as Microsoft 365, Google, Bloomberg, Salesforce, Zoom, and ServiceNow eliminate the need for custom development and APIs, saving time and costs. With Veritas Alta Data Compliance, you can quickly adapt to new message platforms, reduce storage costs, and achieve quick setup without training, maintenance, or updates.
