

Healthcare is at High Risk from Cyber Attacks

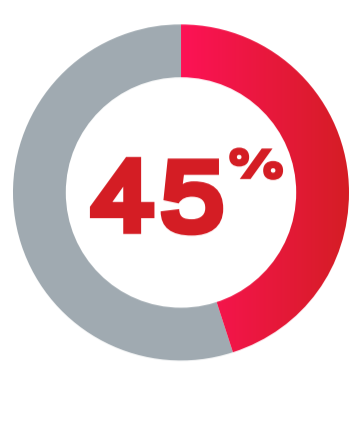

Level up your cyber defense or you could pay a price.

Let's start with a reality check.

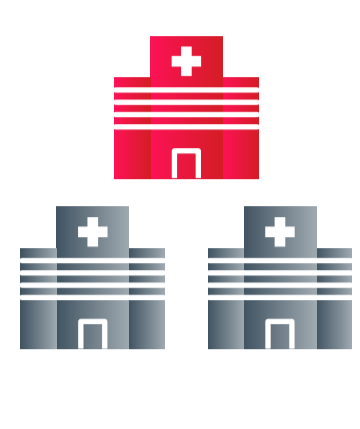

Ransomware is the fastest growing cybersecurity threat for healthcare today.

A majority of healthcare organizations experienced downtime due to ransomware in 2021.¹

Increase in attacks targeting healthcare organizations since Nov. 2020.²

1 in 3 healthcare organizations reported being hit by ransomware in 2020.³

Catastrophic costs continue to rise.

The prognosis isn't pretty for organizations that are unprepared.

\$7.8B

Estimated cost for all healthcare cyber attacks in 2021.⁴

\$250K - \$5M

Range of ransoms demanded from healthcare organizations in 2021.⁴

\$265B

Estimated cost of global ransomware over the next 10 years.⁵

\$9.4M

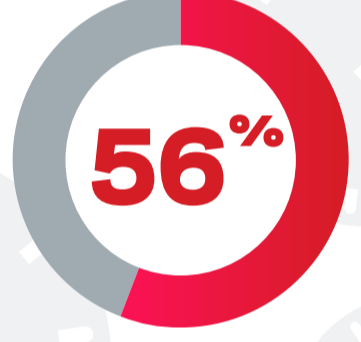

Average US financial impact from a data breach.⁶

Recovery can be painful.

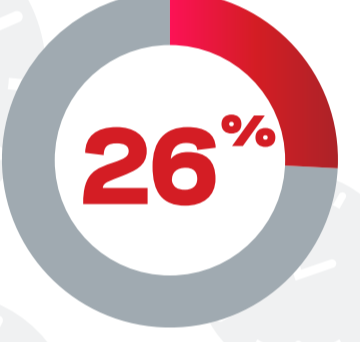

Downtime doesn't just cost money—it causes damage to your reputation.

HIPAA requires orgs to notify patients 60 days after breach.⁷

Healthcare orgs take days to restore operations.⁸

Healthcare orgs take weeks to restore operations.⁸

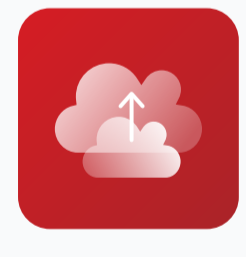

Don't worry, there's good news, too.

Veritas has the perfect prescription to stop the pain of cyber attacks.

Cybersecurity

- Prepare for 'everywhere' patient data
- Keep up with threat actors
- Recover rapidly, with ease

Cloud Control

- Easily manage multi-cloud
- Protect patient data across clouds
- Optimize to lower costs

Data Compliance

- Always be audit-ready
- Only retain what's important
- Find HL7 & HIPAA content on demand

Autonomous Operations

- Leverage AI and machine learning
- Cut costs by automating
- Self-provisioning, self-optimizing

Are you ready to strengthen your cyber resilience?
